**DETAILED ACTION**

1. Claims 49 and 50 are pending and examined.

***Response to Amendment***

2. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

***Terminal Disclaimer***

3. The terminal disclaimer filed on 2/8/2007 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of 09/539,382 has been reviewed and is accepted. The terminal disclaimer has been recorded.

***Priority***

4. This application, filed 9/22/2000, claims benefit of US Provision 60/155,978, filed 9/24/1999.

***Claim Objections***

5. The objection to Claim 50 is withdrawn in view of applicant's amendments to the claims.

### ***Double Patenting***

6. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

7. Claims 49 and 50 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-13 of U.S. Patent No. 7084256 B2.

Although the conflicting claims are not identical, they are not patentably distinct from each other. The claims of the instant invention, drawn to a method a method of making a library of linkers of degenerate sequences, wherein said library is encoded by nucleic acid sequences consisting of a repeated pattern of degenerate repeated triplet nucleotides having the following requirements; (i) position 1 of each repeated triplet cannot be the same nucleotide as position 2 of the repeated triplet; (ii) position 2 of each repeated triplet cannot be the same nucleotide as position 3 of the repeated triplet;

Art Unit: 1639

or (iii) position 1 of each repeated triplet cannot be the same nucleotide as position 3 of the repeated triplet, is obvious over the methods of producing a polypeptide self antigen comprising a linker that is a member of a randomized library of linkers that vary in size and sequence, having degenerate sequences, and wherein said library is encoded by nucleic acid sequences consisting of a repeated pattern of degenerate repeated triplet nucleotides having the following requirements; (i) position 1 of each repeated triplet cannot be the same nucleotide as position 2 of the repeated triplet; (ii) position 2 of each repeated triplet cannot be the same nucleotide as position 3 of the repeated triplet; or (iii) position 1 of each repeated triplet cannot be the same nucleotide as position 3 of the repeated triplet.

### ***Conclusion***
